

RouteOpt®

RouteOpt generates optimal transportation plans and vehicle routes for inbound and outbound logistics operations. We offer a flexible and extensible architecture that is customizable to your needs.

Product Functionality

Advantages

Up to %30
Cost Savings!

By using multiple optimization criteria,
such as:

- Minimum number of vehicles
 - Maximum capacity usage
 - Minimum distance travelled
 - Shortest transportation time
 - Minimum carbon emissions
- or a combination of these for a **balanced route**.

You need a solution that can do more than just help you get from A to B.

Route
Optimization
